Experience

Administrative

Experience extends from the direct security administration of stand alone, governmental, non-profit healthcare facilities, multi-facility, shared service programs, to healthcare security systems applications.

Consultative

Experience includes over 200 objective consultations in 43 states and DC. Facilities range in size from complex 1000 plus beds to 50 bed facilities with no on-site security personnel. Governmental, educational, trauma center, small suburban and rural facilities have been aided in JCAHO/OSHA/NCMEC and security-related compliance issues. Evaluations include a Recommendation Tracking System as a "road map" identifying opportunities for improvement. This consultation service is also used as an educational opportunity related to Healthcare Security.

Training/Education

Experience has been demonstrated through seminars and workshops for single facilities, systems and various organizations/associations such as The International Association for Healthcare Security and Safety, The American Society for Healthcare Engineering, The American Society for Healthcare Risk Management, ASIS International, other professional membership groups of The American Hospital Association and various state organizations.
